

Description for the changes that I made for Lo - Fi and Hi - Fi prototypes

For the Lo- fi prototype there was not much detail and color put into it because it was part of the first iterations that we did when we started to create this website from early on.

As I moved on with the Hi-fi prototype using Figma Tool, I was able to really go in depth about what color the website's navigation bar should look like, what type of font should be used for the website, and what type of button is necessary for the check out page.
